	Question	Reply
1.	It is written that the bidder is responsible for unloading the material, the question: what are the conditions in the unloaded area? Asphalt, tightened area? , Can it be made by forklifts? Are other measures required? What is the size of the tightened area (how many trucks can enter at a time / day)	There is a tightened substrate at approximately 16,000 sqm
2.	What terms of payment will be accepted? Could you open a LC (transferable)?	LC will not be accepted.
3.	I would like to know since the offer is supposed to include transportation and unloading at your site in Ashkelon Is there a tightened area capable of absorbing such a significant amount of plates??	There is a tightened substrate at approximately 16,000 sqm

4.	What lamination test is needed? ASME SA6 and ASMESA-283 dont have restrictions towards lamination tests that have to be applied. The mill request the exact meaning and what exactly needed and the standards that they would like to check.	According to ASTM 537 SACL1 AND ASTM SA283 GR C references
5.	What are the parameters of the tension test? Standard?	According to ASTM 537 SACL1 AND ASTM SA283 GR C references
6.	According to S5.2 ASME SA6 in order to perform the Charpy test the mill has to get the needed temperature, certain figures for the rate of impact test, frequency of the testing.	According to ASTM 537 SACL1 AND ASTM SA283 GR C references
7.	The mill needs the certain figures. The order will not be checked and confirmed with the phrase "whatever mill can do with their best, etc."	According to ASTM 537 SACL1 AND ASTM SA283 GR C references
